Reasons for excisions:

Not Applicable

Summary of reasons for classification:

The computer image file printout entitled *sample4.jpg* is classified as:
Unrestricted.

The publication, a colour photographic image printed onto an A4 sheet of paper, depicts two men and a woman, all clothed in their underwear. One man is supporting the shoulders of the woman who appears to be unconscious. There are several possible scenarios that could be read into this image.

One of these is that the men have drugged the woman and she is a victim of possible assault, however there is nothing to clearly indicate that this is the case. Other possible readings are that the woman has lost consciousness and that the men are trying to assist her, or that the woman is asleep.

The publication has been addressed under s3B of the Films, Videos, and Publications Classification Act, but given the ambiguous nature of the image, the unrestricted availability of the publication is not likely to be injurious to the public good.
